WEB DEVELOPER – 01/05/2024 – 01/09/2024

- **Explored Blockchain Technology**: Gained in-depth knowledge of blockchain principles and their applications while working at Lightency.
- **Developed a Crowdfunding Platform**: Built a decentralized crowdfunding platform on the Ethereum blockchain as my first blockchain project.
- **Utilized Solidity for Smart Contracts**: Designed and implemented smart contracts using Solidity to enable secure and transparent crowdfunding functionality.
- **Built Frontend with ReactJS**: Created an interactive and user-friendly frontend for the platform using ReactJS, ensuring a seamless user experience.
- **Acquired Full-Stack Development Skills**: Gained hands-on experience in both blockchain backend (Solidity) and frontend (ReactJS) development, strengthening full-stack expertise.

🏢 **DAR BLOCKCHAIN** – TUNIS, TUNISIA
BLOCKCHAIN DEVELOPER – 03/02/2025 – 03/06/2025

Developed Cross-Chain NFT Bridge: Built a bridge to enable seamless transfer of Non-Fungible Tokens (NFTs) between Ethereum and Massa blockchains.
Leveraged MERN Stack: Utilized MongoDB, Express.js, React, and Node.js to create a robust and scalable full-stack application for the bridge.
Applied Web3 Technologies: Integrated Web3 tools and protocols to ensure secure and efficient interaction with both blockchain networks.
Enhanced Blockchain Interoperability: Designed a solution to improve connectivity and compatibility between Ethereum and Massa, facilitating cross-chain NFT transfers.
Ensured Security and Efficiency: Implemented secure and optimized mechanisms to guarantee reliable and fast NFT transfers across the two blockchains.
